

HAS HAD HARD LUCK

MORE ABOUT THE NARROW ESCAPE
OF THOMAS W. CRAMER.

His Close Call from Death by Asphyxiation Is Not All of His Misfortunes—He Had Been Out of Work and the Fostoria Papers Report Him To Be Destitute.

The Star of Thursday published an account of the narrow escape from asphyxiation of Thomas W. Cramer. It seems, from the report of the Fostoria Review, that Mr. Cramer has been seeing hard lines this winter. Thomas has been up and down many times in life, and his long residence here and his many acquaintances in this city, will make the following clipped from the Fostoria Review, of interest to Star readers:

All day yesterday, while Fostoria was moving about, a man sat in a chair helpless, in his home, gradually nearing what seemed certain death.

Monday afternoon, Mr. T. W. Cramer, a traveling cigar salesman, who lives at 309 east Center street, went over to the nearest neighbors, Mr. and Mrs. Frank Gibbons, and asked for some medicine, saying that he felt quite ill. Mr. Gibbons went for Mr. Squires, who treated him and then went away. As Mr. Cramer's wife was on a visit to her parents, at Marion, she being afflicted with a tumor on her arm, Mrs. Gibbons asked him to stay for supper. He did so, and then returned to his home.

That was the last seen of him until yesterday afternoon, when Mr. Gibbons, who works at night, arose. Mrs. Gibbons told him that she had seen nothing of the neighbor, and as he was sick, it was thought best to investigate. Mr. Gibbons went to the house and peered through the window. He saw Cramer's sample case and hat, and as he intended to leave on a trip yesterday morning, he concluded that he was still there. Mr. Gibbons informed his wife, and as he had to go to work, he telephoned the police.

Marshal Culbertson came down and made an investigation. All the doors were locked and the keys were on the inside. Going to a window he peered in. There sat Cramer on a chair in the dining room, close to the kitchen door. The window was pried open and the marshal and neighbors clambered in. The gas in the kitchen stove was turned on full, and as it is a dilapidated affair, the fumes came out and filled the rooms with the poisonous gas.

Cramer was dressed only in his night clothes and his head was thrown to one side, the cords nearly bursting. It is thought that the man would surely have been dead had he been undiscovered two hours longer.

He was placed in bed, and the windows were opened. Drs. Squires and Myers were called. He was entirely unconscious and no medicine could be administered. When the review representative arrived, the windows were open, and the man, still unconscious, was breathing with great labor, as if he had a most severe attack of asthma. Neighbors were there and were doing what they could to help matters.

This afternoon Mr. Cramer is in a semi-conscious state, and while the doctors think he will recover, he is not yet entirely out of danger.

A telephone message to his wife, at Marion, brought the reply that she had not the means to come home, and, as Mr. Cramer is in like circumstances, having been out of employment for the past six weeks, Township Trustee Peter has taken the case in hand.

RAILROAD WANTED.

That's What Cochran Wants To Make Her Satisfaction Complete.

Cochran, Jan. 6.—People here are glad to note the fact that the mystery connected with the disappearance of Mary Lee is rapidly being cleared up.

This place will experience quite a boom in the near future. Two new store rooms will be erected this spring. All we want now is a railroad.

Protracted meeting commenced here last Friday evening, the interest and attendance being good.

Lagrippe has made its appearance in this vicinity, Dr. Virden having reported several cases.

Harry Schultz is able to be at work again.

Sam Morral is feeding fifty head of fine cattle this winter.

S. H. King and wife are spending a few weeks in West Liberty, Ohio.

John Webb contemplates getting a bicycle. We earnestly hope that he will learn to ride without losing any flesh.

Prof. Gast, of Prospect, O., will organize a singing class Thursday evening at Union church.

Squire George King reports business flourishing.

Rev. Hyden, of Cincinnati, closed a very successful series of meetings at Union church, ten being converted.

A. L. D. King is attending court at Marion this week.

Miss Rita Myers, of Tullahoma, opened her school at Fairfield Monday after a two weeks' vacation.

I. P. DeLong, of Marion, is visiting friends in this vicinity this week.

Mr. Wright and son, Earl, of Marion, were guests of A. L. D. King last Friday.

Mr. Temple, of Elyria, O., expects to put in a stock of groceries as soon as the new building is completed.

The Modern Mother.

Has found that her little ones are improved more by the pleasant, laxative Syrup of Figs, when in need of the laxative effect of a gentle remedy than by any other and that it is more palatable to them. Children prefer it to all other laxatives. It is a most reliable remedy for all cases of constipation. It is a most reliable remedy for all cases of constipation. It is a most reliable remedy for all cases of constipation.

Stomach and Liver Cure.

Stomach and Liver Cure.

Mrs. Anna Gage, wife of Ex-Deputy U. S. Marshal, Columbus, Kan., says:

"I was delivered of TWINS in less than 20 minutes and was sorely afflicted after using only two bottles of

"MOTHERS' FRIEND"

DID NOT SUFFER AFTERWARD.

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all druggists.

Several Paragraphs of Interest from Tully's Little City.

Marion, Jan. 5.—Prof. F. J. Dandridge, of Delaware, occupied the pulpit at the M. E. church last Sabbath.

Dogs have been playing havoc among sheep in this section. One Weidenher recently had eighteen sheep wounded and killed.

Pork chops got quite hard at Barney (Cyphers) cellar some few days ago. The got the larger part of five hogs, butchered the day before.

Word was received here Tuesday that Ernest Neff, the 6 year-old son of Samuel Neff, formerly of this place but now of Bucyrus, had fallen on a pair of scissors and put one eye out and it is feared the other will be destroyed.

James McKinstry is in Bucyrus. Sam's father's smiling face was seen in our midst last week. Sam is traveling for a wholesale house of Cincinnati in the southern states.

John Neff was in Marion Tuesday on business.

George Timmon was at Bucyrus last Wednesday.

Jacob Bowman has gone to firing on the Snyano.

Mrs. J. L. King has just recovered from a two weeks' sickness and is again able to be about the house.

Little Elmer Dancer is very much improved at this writing.

Mrs. William Burton is now able to be around.

John and Oliver Jones have returned to their studies at Berea after a holiday vacation spent with their parents.

J. I. King, M. D., attended the regular meeting of the Marion County Medical society in Marion last Tuesday evening. He was elected vice president of the society at their regular session for the ensuing year.

Little Grace Burton had her thumb crushed in the cogs of a clothes wringer the other day.

Obituary.

HUNTER—In Matthew Hunter, son of Charles and Martha Hunter, was born at Marietta, Wyandot county, Ohio, April 9, 1857, and died at the parental home in Agosta, on Monday night, January 8, 1896, aged 32 years, 8 months and 27 days.

He was in declining health for many months past, but was spared from taking his bed in prostration. He endured his suffering with great courage and without murmuring, although long-cherished plans were spoiled of their realization. He made an excellent record as a school teacher, and had qualified himself for the practice of law. In a local capacity he had done considerable of legal business.

He was converted to God in a revival held by Rev. John W. Dunning, and at once became an active member of the M. E. church, and remained faithful until death. His death came suddenly and was a translation to the triumphant of the redeemed. He leaves a father and mother, brother and sister, and a throng of friends to admire his virtues and exult in his death.

Funeral services were held at Agosta on January 9, conducted by Revs. Brumbaugh, Leasing and Perry.

A NATIONAL UNIVERSITY.

Another Bill Introduced in Congress For That Purpose.

Another bill to establish a national university at Washington has been introduced in both the senate and the house.

It provides for a university of the highest type, vests the government of the university in a board of 16 members, with the president of the United States at its head, and a university council comprising said board and 12 eminent citizens representing as many of the states, the rights to have charge of all business affairs and the control of all else.

It further authorizes the university to establish such relations with other institutions of the country, provide for the admission of students from all parts of the world, and to receive such aid as may be granted by the government.

It further authorizes the university to establish such relations with other institutions of the country, provide for the admission of students from all parts of the world, and to receive such aid as may be granted by the government.

It further authorizes the university to establish such relations with other institutions of the country, provide for the admission of students from all parts of the world, and to receive such aid as may be granted by the government.

A NOVEL SERENADE.

Schoolboys Give Their Newly Married Principal a Unconventional Greeting.

Professor Charles J. Jennings, principal of the Huntington academy at Huntington, N. Y., has appealed to the local authorities to prevent his pupils from disturbing his sleep at night.

Professor Jennings was recently married, and some of the boys connected with the school took advantage of that fact to pay off some old scores. They prepared a serenade which surprised experts in their line of amusement.

There were 500 persons in the party that made night hideous in front of the professor's residence the other evening, but the teacher proved just as obstinate as ever. He is in and refused to show himself. The crowd worked hard for over an hour, and then went home. But they left a little note on the front stoop which read like this:

Dear Mr. Jennings,

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married. We thought you were a bachelor. We are sorry to hear that you are married. We thought you were a bachelor.

We are sorry to hear that you are married.

KLEINMAIERS' ANNUAL DISCOUNT SALE.

YOU'VE BEEN WAITING FOR IT—HERE IT IS!

KLEINMAIERS'

NINTH 10% ANNUAL DISCOUNT SALE,

COMMENCING SATURDAY, JAN. 11.

ENDING THURSDAY, FEB. 11.

✿ ✿ ✿ An Honest Sale Of Honest Goods At An Honest Discount. ✿ ✿ ✿

A CARD--Nine long years ago we attempted our First Annual Discount Sale. We acknowledged it was not a booming success, although well advertised, the increase in sales hardly paid for the extra advertisements, but we were not discouraged. We knew the trade had been educated to a bantering business. To mark goods at lowest possible price and sell strictly at that price was a new thing for the people of Marion. One-tenth off was no inducement.

Our Second Annual Discount Sale was a success. They have been a success ever since. The trade had learned that Kleinmaiers' marked prices were much lower than the bantering prices of other stores. They have learned that their 10 per cent. discount was an actual saving. Our friends in the "Price-is-ten-dollars, what-will-you-give" stores thought they would fool the trade by offering so large a discount that our 10 per cent. would look insignificant in comparison. Some offered 50 per cent., some 30 per cent., some 20 per cent., but was the trade fooled? No! Marion isn't populated with that class of people. Our increased sales proved that.

Our Ninth Annual Sale Commences Saturday, January 11th. We are Bound to Make This

THE BANNER SALE OF ALL!

To do this we have gone through our entire stock (10 days' hard work) and GREATLY reduced the selling price on almost every article of clothing in our store. The reduced prices we have marked in red ink, the former price (in black ink) still remains, so the purchaser can see just how much of a reduction there is. FROM PRICES MARKED IN RED INK YOU STILL GET THE REDUCTION OF 10 PER CENT., thus making this

The Greatest Bargain Sale Ever Given In Marion.

Early Purchasers Will Get Cream of the Stock. Remember, Thursday, February 11th Ends It.

Nothing Will Be Charged During
This Sale. Terms
STRICTLY CASH.

The report that the wholesale arsenic dealers are behind State Senator Whitless's bill to raise the retail cigarette tax to \$100 is vigorously denied.

The Tall Mall Gazette refers to the German press as official, semi-official and reptile. Great shades of the Arizona Kicker! Who says that journalism is degenerating?

Governor Lowndes, the first Republican ever elected to the gubernatorial chair in Maryland, took his seat Wednesday. And Maryland, my Maryland, goes right along without Ross Gorman having his hand on the steam valve.

Now that the village council of Postoria has let a contract for lighting the city for the next five years to a new light and power company, the chronic kickers there are lauding the virtues of "The Light That Failed."

It isn't safe to go through Marion on a train--Gallon Leader.

It's perfectly safe to go through Gallon, anyway--unless you believe in ghosts.

THE CHATTEL MORTGAGE LAW.

Chattel mortgages were seldom used as a means of security, before the present constitution of the state was adopted; and, being confined almost entirely to transactions between neighbors, for small amounts, township clerks were proper officers, with whom to file such instruments. But with the development of manufacturing and new methods of business, and now a very large proportion of chattel mortgages are given to secure payments for heavy machinery, musical instruments, alcohols, fixtures, and goods sold on the installment plan; and in almost every case the mortgagee, being a non-resident of the township in which the mortgage must be filed, is put to great and unnecessary trouble and expense to renew, not only because of distance, but because when his agent gets there the township clerk is often found away from home, while if an affidavit for renewal is left, or sent by mail, the clerk often fails to perfectly attach and refile.

The larger part of such mortgages are poor people, often without any real estate, or influential friends, and their credit frequently depends upon ability to use their chattels as security. The power to do this ought not to be abridged and made doubtful by law, as is now the case but the same power should be given to poor people to use their chattels as a means of credit, as given to the holders of real estate.

In response to a very general demand for such changes in the present laws, as will permit all such mortgages to be filed with county recorders, and to require no renewal, at least, until after the maturity of the debt secured thereby, our representative, Mr. Hensley, has just introduced a bill in the House, making such radical and satisfactory changes in the present law.

Often good bills fail from lack of interest manifested by the parties most to be benefited; or by lack of special knowledge on the part of legislators, and it is to be hoped that in the present instance everybody who has much to do with chattel mortgages will feel it their duty to talk with and write to members of the legislature, explaining the necessity for such changes, and thus assist our worthy representative to have his bill enacted into a much needed law.

Statistics show that the debt of Ohio has been reduced in the last five years from \$7,130,000 to \$6,770,000, but said to say the assessed valuation of the state is also decreased. It was \$7,770,000 in 1890 and in 1895 \$7,130,000.

Attorney General F. S. Monnett, of Bucyrus, has at last received a new year's present in the shape of a \$7500 damage suit against him for injury to E. A. Benefield, a T. and O. C. brakeman whom he sued for embezzlement. Finley and Judge Beer represent the plaintiff and will endeavor to make the path of the brilliant young attorney general as far from one of roses as possible.

January ninth is past and yet the world do move, the Indiana prognosticator's prophecies to the contrary.

Indiana Times.
[Upper Sandusky, Ind.]
Several days ago, papers were filed with the secretary of state at Columbus for the incorporation of the Cleveland and Southwestern Railway company. The incorporators are Judge Thomas Beer, George Dammewirth, J. H. Robinson, S. W. Bennett and W. A. Blicke.

The capital is \$100,000, but of course will be greatly increased when the road is built. The articles of incorporation state that the road is to begin at York, Medina county, and pass through the counties of Medina, Wayne, Ashland, Richland, Crawford, Wyandot, Hardin, Allen, Van Wert and Mercer to the Indiana line. It is thought that the road will connect with other roads to make a through line between New York, the metropolis of the east, and Chicago, the metropolis of the west, as parties from New York are behind the project, and will furnish the necessary capital.

Her Attention Was Everywhere.
"Every one in town at that night," said he.
"Did you not stay up all night?"
"Yes, I would like the play?"
"The play? Well, usually, you know, I was there with a box party,"

D. A. FRANK & Co.

RAILROAD NOTES

C. D. Ward, the Erie auditor, was in the city today.

Trainmaster Kinney, of the Big Four, was in the city today, examining the employees on color blindness. He had a caboose fitted up, and every one of his employees was obliged to undergo the test.

The Erie railroad men, seaf at the idea that the C. and E. division terminal will be removed to Union, and hold forth that if such were to be the case that a new yard office would not be erected here, and a number of other improvements that are being made in the local yards.

Columbus Dispatch: William Garstang, superintendent of motive power of the Big Four, is now working on two different plans and specifications for freight engines of ten-wheel type, proposing to select the one which will insure the best performance. In 1890 the Big Four will purchase eight freight engines, six heavy passenger engines and six large switch engines.

Union Leader: The Erie people brought the Pullman company so terms in a way which must be gratifying to those who watch the movements between the sleeping car companies and the railroad companies. The new Erie company notified the Pullman company that after Jan. 1st would accept Pullman's plan for handling its cars over the Erie, giving the Pullman company forty-eight hours to decide whether or not to accept the proposition. In the meantime the Wagner sleeping car company has been notified to have fifty sleeping and parlor cars ready for immediate use. Before the 48 hours had passed the Pullman company accepted the situation, and the Erie, on the first of the year, discontinued paying mileage.

Ladies' wool under suits at \$1.00 each. D. A. FRANK & Co.

A ROWING INVENTION.

Walter B. Post's New Device For the Coaching of Crews.

Rowing is now getting down to such a fine point that the introduction of new devices toward aiding the coaching are always of the greatest importance in turning out winning crews. Walter B. Post, Columbia's noted coach, has just taken out a patent for an invention that he tried on last year's Columbia varsity with great success. It is an appliance that enables the coach to see the position of the sliding seat up in the outside of the shell. The seat ordinarily is completely hidden from view, and thus the amount of slide it covers, which is of vital importance in coaching, can only be approximately determined.

The new device consists of an indicator attached to the back of the seat and reaching over the side of the shell. The indicator, which is black, can be easily seen when it moves over the white scale on the outer surface of the shell. The scale is graduated so as to enable the coach to note exactly the position and various movements of the sliding seat. By means of this invention it is very easy to catch a crew in a uniform length of slide, and it is an accurate yardstick for the slightest error in regard to the use of the seat.

Post's invention is of the greatest importance to rowing from the fact that the proper use of the sliding seat in a shell by the crew has been a matter of doubt with fast rowing, and in order to teach a crew well the manner of sliding it is necessary that the coach shall always know exactly what the men are doing with their seat. —New York Sun.

Vincennes's Capital.

Vincennes, the capital and chief city of Vermont, has a population of 10,000, less than that of Fall River. It is built on an elevation of 1000 feet above sea level. It was founded in 1797. Vincennes is an Indian name, the name of the Indians of the neighborhood which the Spanish pioneers affixed to the original title of the new town, Santiago de Leon. In 1817, the year of the latest American war with Great Britain, an earthquake in Vincennes killed 10,000 persons on the ruins of a part of the city. The date of this earthquake was March 26.

To Excrete by Carbolic Acid.

In Germany the new claims that the excretion of carbolic acid should be by some means more certain than the old-fashioned plan, Dr. E. C. Culmann, a celebrated chemist, suggests the use of carbolic acid. As a result of his plan, the cream of carbolic acid is a pill which can be taken as easily as a pill, and it is a gas, from floor to ceiling. When the gas reaches the delinquent's stomach and nose it causes instant purgation of the lungs and stomach, and life is saved without previous suffering.

SUSIE HILE FINED

AN AMUSING SCENE IN POLICE COURT THURSDAY EVENING.

A Large Crowd Gathers To Hear Something Sensational. But All Are Disappointed—An Overcoat Thief—Notes of the Police and the Court.

At 7 o'clock Thursday night the office of Mayor Nichols and the hallway at the city building were both crowded with a motley crowd of spectators, who had gathered to hear something sensational. The fact that a woman of the town was to have a trial was enough to draw a crowd. It was a queer looking assemblage. There were men old ones, too, whose heads were bald, others whose hair was gray with age, then there were young men, office clerks, salesmen, laborers, loafers and small boys.

It was some time after the appointed hour that Mayor Nichols put in his appearance and called for the prisoner. Marshal Blain managed to usher Susie and her friend, Fay Ross, through the crowd, and they were seated before the mayor. Mayor Nichols looked over the anxious crowd with a twinkle in his eye, and then in a voice scarcely audible read the charge. Susie Hile in a low voice answered that she was guilty. The mayor in almost a whisper fined her five dollars and costs, and Marshal Blain took the prisoner out ere the astonished assemblage realized what had been going on. Susie intends to leave Marion before long.

Scotfield, Durfee & Scotfield have filed a bill of exceptions in the mayor's court in the case of the City of Marion against Ben Mosier, who is charged with gambling. They set forth that the ordinance under which he is arrested is illegal. The ordinance was passed away back in 1878, and it is recorded from its third reading, but does not show that there was ever a first or second reading. The case will have a final hearing in the court of common pleas.

Lewis Holverstott, who has been charged with stealing coal from Hawkins Brothers, will be given a hearing in police court, this evening, unless the matter is settled during the day. This case has attracted considerable interest.

Officer Munsell has been enforcing the laws on the lewd women of West Marion, and Thursday gave strict orders to stop loitering on the streets and not to go near the depots. Officer Munsell is of the opinion that West Marion needs a little reform.

Fifteen tramps dropped into Hotel Carlos, Thursday night, and were given lodging. One thing noticeable about the majority of those who register is that they have cards to show that they are union men, and have at least worked some time.

Patrick Mahoney, the overcoat thief, was released this morning. This sounds strange, but it was all due to the fact that he was a member of the machinists' union. He claimed it was his first offense and the union intervened in his behalf with H. Streitz, who decided not to place any charges against him. Mahoney claims to be 26 years of age and says that he worked here in 1888. He was given a lecture by both Mayor Nichols and Henry Streitz. He promised not to drink, and leave Marion and if possible secure work. Before going he thanked the mayor, marshal, Mr. Streitz and those that had assisted him.

All dollar linens, 72 inches wide, at \$7.50 per yard. Ours are the German linens. D. A. FRANK & CO.

A GALLON LADY. Her Death Occurs at the Sanitarium This Forenoon.

Mrs. Myers, wife of John Myers, of Marion, died, this morning, at the Sawyer sanitarium. The lady arrived here a week ago and went to the sanitarium for treatment. She was suffering from a disease common to her sex, and was obliged to undergo an operation, for this was her only hope. She became worse this morning, and between 10 and 11 o'clock passed away.

Mrs. Myers had been twice married and had two children living, a son and a daughter. She was formerly of LaRue, but last fall was joined in wedlock to John Myers and went to live with him at Marion. The grief-stricken husband was at her bedside at the time of her death.

The remains will be taken to Lathrop this evening, but the final arrangements for the funeral have not been made.

Same Penalty. "Don't—Surely you do not regard poverty as a crime?"

Cleveland's BAKING POWDER.

"Pure and Sure."
"I prefer Cleveland's baking powder because it is pure and wholesome. It takes less for the same baking, it never fails, and bread and cake keep their freshness and flavor."
Miss CORNELIA CAMPBELL BEDFORD, Supt. New York Cooking School.

COURT HOUSE ITEMS

BARBARA DEXTER SEEKS A DIVORCE FROM OSCAR L. DEXTER.

The Witnesses for the Defense Are on the Stand in the Tongue Case—John G. Ruth Sues J. Green—Pleadings Filed Today.

C. F. Garberson, as attorney for Barbara Dexter, this morning filed in the court of common pleas a petition for divorce against Oscar L. Dexter.

After setting up her residence in Marion county, the plaintiff says that she married the defendant August 25, 1887, and has always conducted herself as a faithful, considerate and virtuous wife and that to them was born a daughter, Madolen, who is now twenty months old.

The plaintiff alleges in disregard of his marital duties, the defendant has been guilty of gross neglect of duty for more than three years last past in that he has wholly neglected to provide plaintiff a home and the necessities of life, either food or clothing, to the extent that she could not appear in public without indecently exposing her person.

The plaintiff further says that the defendant is guilty of intemperance and of heaping vile and filthy abuse upon her and in all ways annoying and aggravating her.

Plaintiff says that the defendant has frequently abandoned her and persuaded her to visit her parents and that while away he packed up and removed his wearing apparel.

She says that he appropriated her rings valued at \$15 and sold them, that he has abused her, called her filthy names, infamous names reflecting on her character; that while still sick from child birth he struck her on the breast and shoulder and that he threatens to steal her child away.

On account of the several matters stated the plaintiff wants a divorce and the custody of her child and an injunction restraining the defendant from ever molesting or interfering with her in the custody of her child.

As attorneys for John G. Ruth, Johnston & Young, today, filed in the court of common pleas a petition against J. G. Green, asking for a judgment on a note of \$55, with interest from April 10, 1884.

In the case of Magdaline Biggerstaff against Elmina O. Johnston and others, W. Z. Davis, as guardian ad litem, today, made answer in the court of common pleas for the minor defendants, Hugh Wilson Johnston and Margaret Jane Johnston.

The receiver in the case of Watkin Watkins and others against the Citizens Bank of Prospect, Thursday, filed an itemized statement of his expenses in the sale of personal property.

The case of the State of Ohio against Michael Tonguet is progressing in the court of common pleas. The state has presented its evidence in chief and the defense is offering evidence.

\$1.00 outing flannel dressing jackets at 50c. D. A. FRANK & CO.

MISS AVA WILSON

Entertained, Thursday Evening, in Honor of Miss Anderson.

Miss Ava Wilson entertained a small party of her friends at the Wilson home on south Main street, Thursday evening, in honor of her friend, Miss Anderson, of Union City.

During the early part of the evening, piano was played, the honors being carried off by Miss Ada Bowen. After dainty light refreshments had been served, dancing was indulged in until a late hour.

In addition to Miss Anderson, the honored guest, Misses Smiley, Eckhart, Schultz, Ada Bowen, Clara Louise Johnston and Nettie Quigley, and Messrs. T. M. Cunningham, T. R. Allen, H. G. Thomas, H. G. Foster, D. C. Duse, C. Wright, S. Schultz and G. H. Chier were present.

PERSONAL.

J. J. Hane was at Columbus today on business.

Michael Carpenter spent Thursday in Columbus.

Walter Hank has returned from a visit at Columbus.

L. L. Palm, of Columbus, is the guest of friends in this city.

Sherman Schultz made a business trip to Harper this morning.

Auntie: "Well, Effie, did you enjoy your party last night?"
 Effie: "Very much, thank you, auntie."
 Auntie: "And I suppose mamma was there to look after you?"
 Effie: "Oh, no! Mamma and I don't belong to the same set."—Panel
 Domestic Economy. "What is your?"
 "What's this?" exclaimed the young "On to Niagaraville tomorrow."

"Arthur is suspicious about that," made you think him suspicious. They
"Dinner, but it come over me the was."
"Do you want to swear out a war again here?"
"Times not."
"Then the prisoner is discharged."
I went to the hotel and got sup- and after the meal sat down at the round for a smoke. In the course of minutes the same exorable waiter the steno and air manched me and s

"I'm so worried about my daughter," said the woman in the new fur cloak. "She goes all out so often, so depressed. I'd give the world, doctor, to see her smile again."

"That's easy enough," answered the doctor. "She's just out of control."

"Stranger, I've come to apologize," said the woman. "For arresting me? Yes, you're hasty, but it's all right."

"Thank you. As you see, it's just a way. I've been a constable in this town for 32 years and I never arrested a criminal."

"You're a constable?"

"Yes. Got to think of a good way and time to do it."

—New York Review.

An Interesting Device.

"I'll say," said one British official, "I've never had such a minute little supply of whisky. It isn't much good as it is."

She Was a Pouter.

An hour after dark, about five o'clock, came a gale and rain. The wind blew up to a Nebraska ding-dong and then died "Hello!" After a few women departed at the door, I asked what was wanted.

"Oh! I have a dress for the new

THE WIZARD ON WAR

HOW THE ONLY EDISON WOULD TREAT A FOREIGN INVADER.

Electricity as an Engine of Destruction. Cables Laden With Torpedoes—Ordinary Water Could Be Charged With Death Dealing Currents.

Thomas A. Edison, wizard and workman, has ideas for waging war with electricity.

"The only sort of war I believe in and the only sort that I look forward to is commercial war. That sort of war is warlike enough for anybody, as you know if you have ever tried it.

"However, I have been thinking a little about plans for convincing Britannia that she does not rule the waves as thoroughly as she seems to think she does.

"Mind you, by the way, I am quite certain that a great deal has been done in the way of coast defense by the navy that the public knows nothing about. I am sure that much has been perfected in the way of electrical coast defense.

Some of the best electricians of the country are turned out at Annapolis. They are hardworking and intelligent fellows. I am willing to bet that they have thought of something that would surprise the English if they should hear of it.

"At the same time no man can think of everything, and perhaps this idea of mine that I shall tell you about would be of use. The navy has men who could easily carry out the idea if it were given to them. It is simple.

Mr. Edison got a big sheet of paper and soon made the outline of the picture to illustrate his idea. Then he explained the plan which is to make battleships cheap and New York city as safe from bombardment as Colorado Springs.

"The trouble seems to be that the English have ships that could sit out at sea and shoot at us from a distance of ten miles. That would annoy us, no doubt, but I think my plan would intercept the passage of the vessels on their cheerful bombardment errand. I feel sure that the cables could go out at least 15 miles. They would run on wheels placed at the bottom of the water. To these cables would be attached torpedoes at short intervals, torpedoes of great destructive power. The cables could be moved back and forth from a subterranean workshop on land, shifting the positions of the torpedoes beneath the waves as they moved. The topography of New York's coast makes it easy to plan for a series of these submarine cables so arranged that every English ship would be compelled to cross one or more of our submarine torpedo necklaces. With a range finder it would be simple to ascertain the exact spot at which the ship would cross the hidden cable. The cable would be pulled along so as to place one or more torpedoes just under the ship as she passed. The torpedo, held to the cable, would be released by a magnet and would shoot to the surface. Being provided with a pressure diaphragm—that is to say, with an apparatus causing it to be electrically exploded as soon as the pressure of the deep water should be removed—it would burst as it got beneath the ship, and that would be one warship that would never bombard New York.

"I should think that a great number of these cables could be laid for a small fraction of the cost of even a small navy. The cost of one English battleship would supply cables and torpedoes enough to blow a whole navy into the air.

A protecting belt of these cables, covered with torpedoes and crawling like snakes along the bottom of the ocean, waiting for invading ships, ought to make me feel pretty safe. Engineering skill should be able to send them out to any distance. Their exact location would be kept a secret.

We should then have in our hands practically a series of great dynamite guns able to shoot 15 miles or as long as the longest cable, and with the advantage of going off point blank. Such cables stretching out from Staten Island, from Sandy Hook, from Long Branch or wherever they might be wanted, would make this port uninviting to strange ships in time of war.

"I have a lot of other schemes in my head, but I have not the time to think seriously of what may never be serious. I needed, we need cheap electric lights and cheap electric power and cheap electric transportation in this country more than we need electric guns. But it is interesting to think of going and slaughter for a change.

"I rather like my idea of flying torpedoes, and I think that they might prove eventually to be great pacifiers. They would make us electrically and once being launched they would fall, quite unlike the gentle dew, from heaven and blow everything to pieces. The trouble is that they would be more useful to the invading English than to ourselves. The English would learn to make the firing torpedoes, bring over ships loaded with them and send them up to drop down on us. It would be hard or impossible for us to drop them with sufficient precision on the enemy's ships.

"If we had them first, however, we could send them over England on fast cruisers and drop a few on London or Windsor in a manner persuasive. I think that when the art of war shall enable fighting countries to drop flying dynamite torpedoes on oceans and presidencies, when no retreat will be safe and the sending of common men to be shot or subsequently razed will no longer be the whole story, arbitration will become unreasonably popular.

"What we need is to make sure that war will mean the death of those who declare it, and declarations of war will be scarce.

"My plan for using a stream of water with an electric current attached would be of special value in defending a fort against assault. It is nonsense to offer any objections to the plan.

"It is as simple as A B C. With 25 men in a fort I can make that fort also-

WIMAN IN HARNESS AGAIN.

The Veteran Financier Begins Life Anew at Fifty Years of Age.

Erastus Wiman, whose rise from newsboy to millionaire used to be held up as an example for the nation's small boys, will in a few days take up the cudgels against fortune again. He will renew his ambitious schemes for the development of Staten Island.

It is said on good authority that Mr. Wiman is backed by a syndicate of Wall street men who have faith in his enterprise.

Erastus Wiman began business life in Toronto 50 years ago as a newsboy. He learned typesetting. Then he became a reporter and finally commercial editor of the Toronto Globe. His market re-

ports attracted wide attention, and R. G. Dun & Co. made him their Canadian agent. Then he was called to the New York office of the firm and was made manager at a salary of \$40,000 a year. He bought a house on Staten Island and set about inducing the B. & O. railroad to make its terminal there. He invested large sums in Staten Island property. Then the directors rescinded their action, and Mr. Wiman's dreams were buried in unprofitable land. Then he organized the Staten Island Rapid Transit railroad. He entered into hundreds of other ambitious schemes, but he had too many irons in the fire, and financial ruin came. Then it was that R. G. Dun & Co. prosecuted him for an alleged forgery. He was convicted. The court of appeals reversed the decision of the lower courts, ordered a new trial, and Erastus Wiman, with renewed hope, begins almost where he began half a century ago.—New York World.

He was convicted. The court of appeals reversed the decision of the lower courts, ordered a new trial, and Erastus Wiman, with renewed hope, begins almost where he began half a century ago.—New York World.

ports attracted wide attention, and R. G. Dun & Co. made him their Canadian agent. Then he was called to the New York office of the firm and was made manager at a salary of \$40,000 a year. He bought a house on Staten Island and set about inducing the B. & O. railroad to make its terminal there. He invested large sums in Staten Island property. Then the directors rescinded their action, and Mr. Wiman's dreams were buried in unprofitable land. Then he organized the Staten Island Rapid Transit railroad. He entered into hundreds of other ambitious schemes, but he had too many irons in the fire, and financial ruin came. Then it was that R. G. Dun & Co. prosecuted him for an alleged forgery. He was convicted. The court of appeals reversed the decision of the lower courts, ordered a new trial, and Erastus Wiman, with renewed hope, begins almost where he began half a century ago.—New York World.

PROBABLY FATAL

WILL BE THE INJURES RECEIVED BY
JAMES LAWLER.

A Peculiar Accident at the Marion Manufacturing Company's Plant. This Morning The Skull of the Victim Crushed and He Is Sinking.

James Lawler, a carpenter working for the Marion Manufacturing company, had his head crushed about 10 o'clock, this morning, and it will be a miracle if death does not ensue.

The company is erecting a new warehouse along the Short Line transfer and in its construction a number of carpenters are employed, one of whom was Lawler, who has been working for the company only a few days.

This morning about 9:30 o'clock it was found necessary to move a cut of cars, loaded with slack, which were standing on the transfer. A traction engine was run around to the transfer and one end of a cable attached to the engine and the other end by a great iron hook was attached to the drawhead of the car, at the opposite end of the car from the traction engine. In this way the car was moved and a second attempt was made, this time to move two cars.

Superintendent J. W. Stringer, who was handling the engine, told Lawler to attach the cable the same way as he had fastened the hook before. Lawler fastened the hook, Mr. Stringer started the engine, the rope pulled taut and then the hook slipped and coming around the end of the car with frightful force struck Lawler over the eyes, fearfully crushing his skull and making a hole in which one could place a finger.

Workmen rushed to pick up Lawler, who was perfectly unconscious, and apparently dead but life yet remained and medical assistance was called for.

Lawler was conveyed to his home on silver street, and by the time he arrived there Dr. Rhu was on the scene ready to dress the wound but he expressed little hope that the wounded man would recover.

When the blood was washed away it was found that the wound was a frightful one and it will be the greatest wonder imaginable if the wounded man survives his injury.

No one knows just how the accident happened as Lawler was the only one who knew how the hook was fastened to the car. The first time the hook was inserted in the head of the draw bar and the pin run through the hook, but no one saw Lawler fasten the hook the second time and it is supposed that he simply hooked the cable over a burr on the dead wood as the edge of the burr rubbed as it might be if had the iron hook had been violently wrenched off of it.

The injured man is about forty-five years of age, is married and the father of six children.

D. A. FRANK & CO.

THE CITY IN BRIEF.

The Patriarch's Militant are soliciting advertising for their encampment program. It is to be an elaborate affair, printed in circular form, giving the program of the full week.

The guild of St. Paul's Episcopal church met at Mrs. Ed. K. Clark's, of north State street, Thursday afternoon to make arrangements for an entertainment in the near future.

The Marion Milling company shut down their mill today. New machinery is being added and a number of repairs are being made. The mill will resume work again Saturday morning.

The White Elephant saloon which was attached through the court of Squire Osborn some time ago, and of which Charles Gompf was appointed receiver, was sold today. Andy Ritzler, of Augusta, purchasing it.

Dr. O. W. Weeks received word today from General Charles Townsend that he would arrive here Monday afternoon at 1:30 o'clock to be present at the public installation of the Grand Army of the Republic Monday night.

At the meeting of the Elks Thursday night it was decided to hold the social session later in the year. The ladies requested an extension of time and it was granted. The affair will not likely occur for about six weeks.

William A. Monnett, who is to retire from the firm of Kramer & Monnette, tells the Star that he will remove to Crawford county and will reside on a farm there. He does not expect to adhere strictly to cultivating the soil, but will deal in stock. Mr. Monnette has already had much experience in this business, and success cannot help but follow him. His friends at least wish him that and much more.

SICK AND CONVALESCENT.

Mrs. Charles Fletcher, of Belleview avenue, who has been sick for the past four weeks, is reported no better.

Mrs. H. T. Taylor is ill at the home of her parents in Cardington, but hopes to be able to return here Saturday.

Wilson Terry, the north State street grocer, is somewhat improved, but he will be confined to the house for several days yet.

The Implement Co. Election.
The annual meeting and election of The Implement Manufacturing company was held at the company's office on Greenwood street, Thursday evening. The old board of directors was unanimously re-elected. It consists of E. Huber, J. J. Hane, S. Wilson, B. G. Young, Isaac Shupp, J. E. Bryan and H. A. Martin. It is understood the directors will continue the same executive officers.

General Manager Martin's annual statements showed a satisfactory year's business, the net earnings having been abundant to pay a dividend on the paid up capital and leave a surplus. No dividend was paid, however, but the profit applied to reducing the old debt of the company. The feeling is that Mr. Martin's management is surely working the Implement company's business upon a successful basis and what once threatened a failure will prove a profit bearing institution.
